## Pennsylvania Railroad

### GLe Class Cement Car

(photo of prototype © Kohs & Company, Inc. 2000)

The Pennsy 'GLe' class cement car is our first effort with freight rolling stock and for us it's a particularly exciting model. Although the 'GLe' is a 'common' piece of revenue equipment, it offers us some great modeling opportunities. The railroad constructed 250 units in this class, they were actually rebuilt from Standard Steel Car Company built 'GLb' class open hopper cars and they were in service for several decades. We will offer four (4) paint schemes and a variety of car numbers to allow prototypical consist strings. Some of the detail offered will be: fully sprung ball-bearing equipped trucks, wooden walkways, operational hatches with prototypical locking bars, full underbody detail and Kohs & Company or P:48 wheel sets.
