Pennsylvania Railroad N5/N5b Cabin Cars

The third in our series of caboose projects, the Pennsylvania N5/N5b cabin car project will build on the success of our 'Penny' N5c project which was the first in our series. We will produce a variety of versions among them; antenna and non-antenna versions, as-built N5's, rebuilt N5's with collision posts and N5b's. In addition, there will be variations within the general versions providing for a range of time periods, service locations and service types, including Express Service variations.

To receive our newsletters and periodic project updates please contact us by any of the following means:
